

Paint and Roofcoating Systems

Evolving Elements is the latest Paint and Roofcoating Systems brand to hit the Australian market, Owner John Gaggiano has been in the paint and protective coatings industry for over 30 years and has built a reputation of unparalleled quality, innovation, value and performance across all of his brands only sourcing the highest-grade materials available on the market today across all his brands and products.

We create quality

Our ability to continually set industry highs for quality, performance and value depends upon the steadfast maintenance of our product, recognition of changing technologies, reward and acknowledgement of our people, proactive responses to the needs of our customers and continued commitment to innovation, research and development of new products. Our diverse and exceptionally experienced team searches out, develops and evaluates new materials, technologies and services that continue to improve our products. We create quality products because we want to.

The Evolving Elements Coating System includes a full range of components and procedures for coating commonly encountered roof substrates. The Evolving Elements Roof Coating System is specifically designed to rejuvenate, restore and seal old and aged roofs to their former colors, or to a new and more modern color. Roof coating system products namely Durapoint is also used as a flexible pointing product for new roof tiles. Our premium roof paints offer high-quality results, and the coating system is fully covered by a 10 Year Evolving Elements Warranty.

Consult our Technical Data Sheets for further information on each product.

Products are fully supported by our warranty.

The product must be used in accordance with our recommendations and we cannot cover damage due to movement or failure of the substrate or structure.

Disclaimer - This card shows examples of colours in a low sheen finish.

A different gloss level will alter the appearance of a colour. Factors such as application method, substrate type and ambient temperature can also cause variation. Colour accuracy cannot be guaranteed because of limitations in the printing process.
